Oana Jinga

Co-founder, CCO, DEXORY

Oana Jinga is an entrepreneur and technology expert, co-founder and Commercial Director at Dexory - a UK robotics and artificial intelligence company for the logistics industry. Dexory's unique solution combines hardware and software to provide instant visibility into warehouse inventory and operations. Using 12-meter-tall autonomous robots to capture real-time data and images, the revolutionary digital twin technology enables instant analysis of inventory, occupancy and goods movement.

Before founding Dexory, Oana worked at Google in the London office as Partnerships Manager for 7 years and at Telefonica, O2 as Business Development Manager. She studied Communication, Public Relations and Management in Bucharest and then in the UK, followed by a series of specialization courses at various universities such as Yale, London School of Economics, Wharton, etc.
